

Download app and login

Logging in for the first time? This will require Two Factor Authentication.

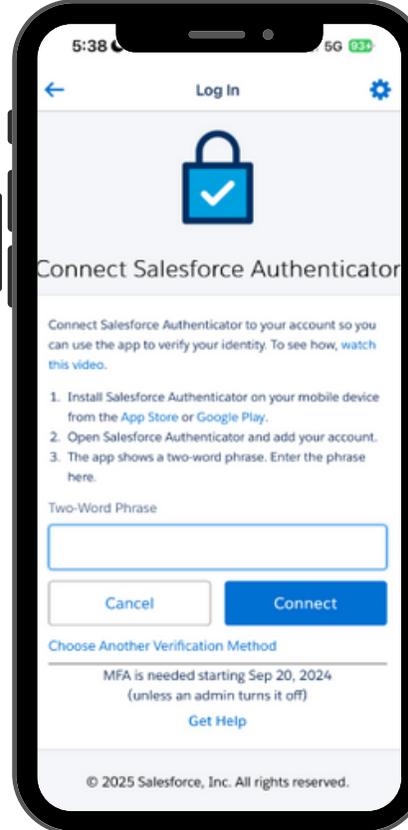

1. Search "Salesforce" in your app store and hit "GET"

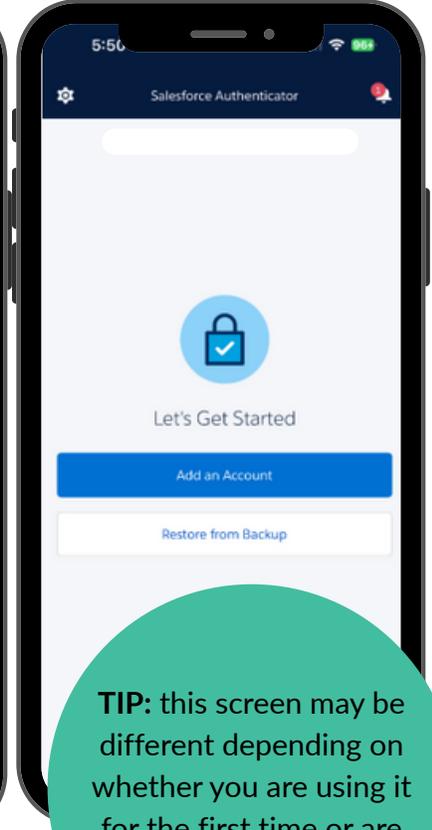

2. Choose Verification Method. I had chosen Salesforce Authenticator here.

3. Install Salesforce Authenticator (or use another Authenticator app that you have)

4. Once Salesforce Authenticator is installed, select 'Add an Account'

TIP: this screen may be different depending on whether you are using it for the first time or are already using it

Download app and login

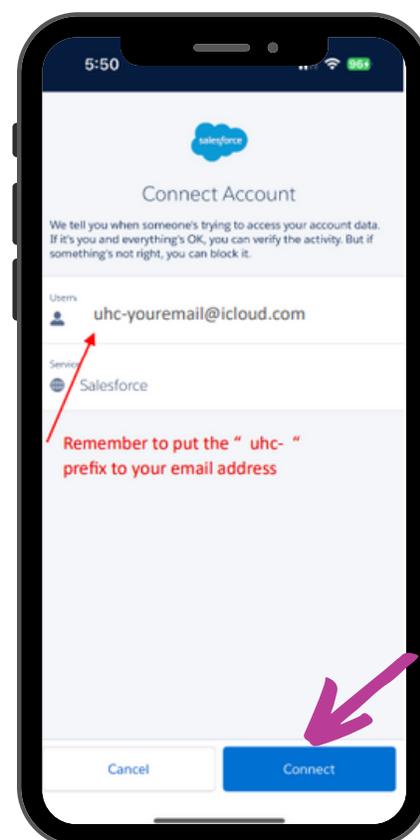

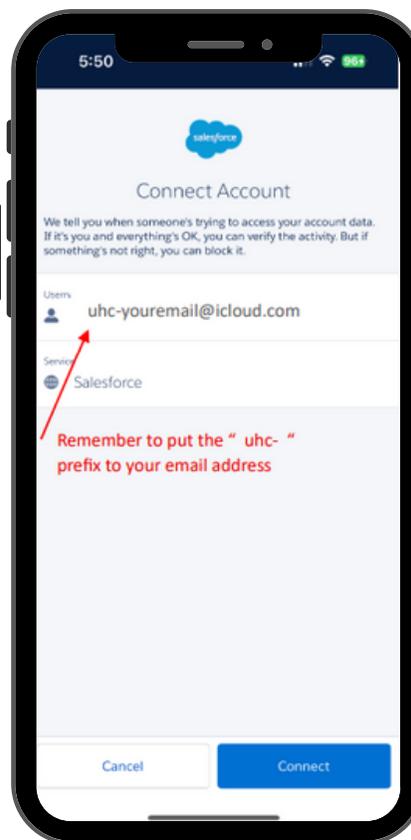

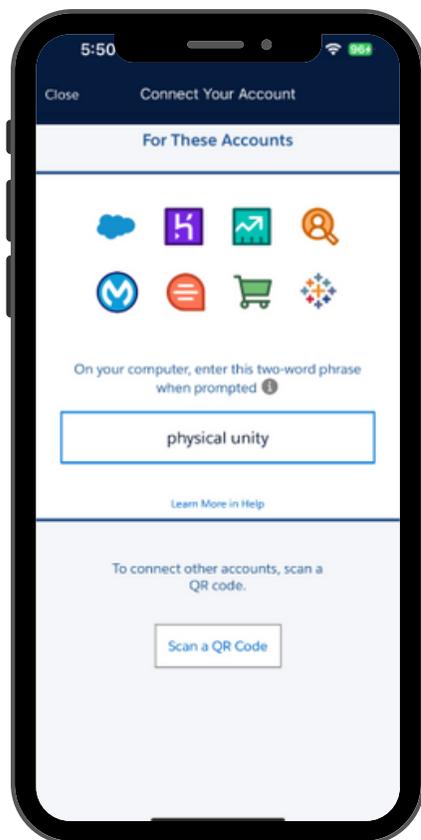

Logging in for the first time? This will require Two Factor Authentication.

5. You should see a **two phrase you can copy**. In this case, it's 'physical unity'. **Go back to Step 3 and paste that in Salesforce.**

6. 'Check Your Mobile Device' screen should now appear on your Salesforce Mobile App.

7. Navigate back to Salesforce Authenticator and login. Your username is:
uhc-[your email address]
(e.g. uhc-john@gmail.com)

8. Click 'Connect'.

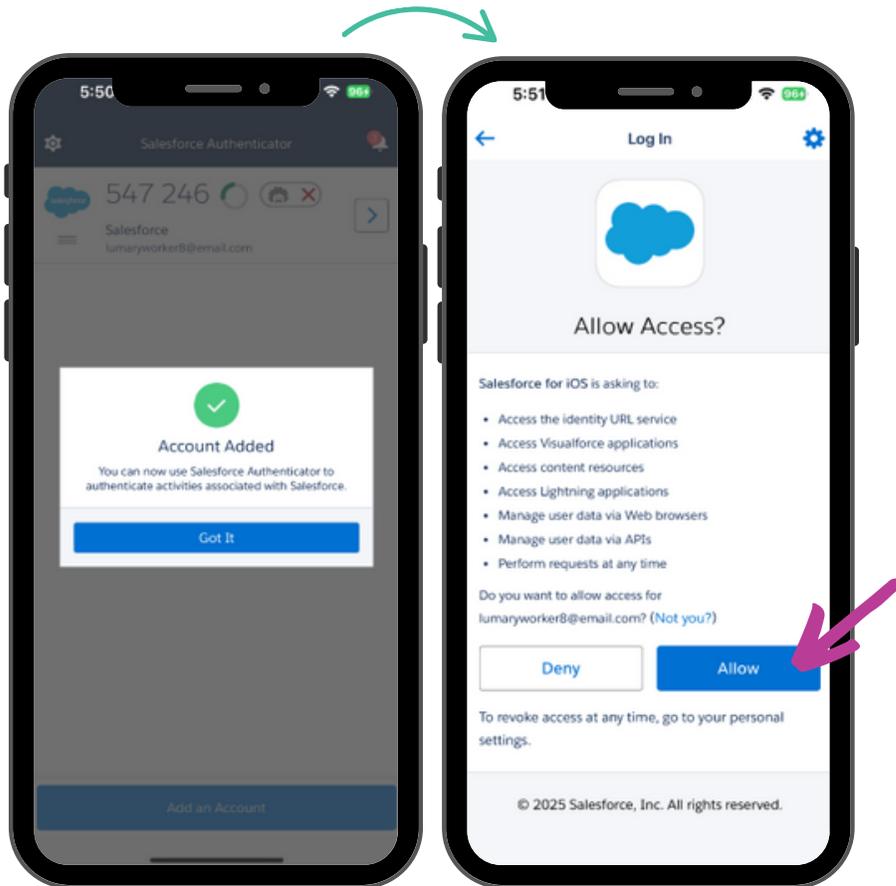

Download app and login

Logging in for the first time? This will require Two Factor Authentication.

9. You should receive a confirmation on the Salesforce Authenticator app as 'Account Added'.

10. Navigate back to the Salesforce App to 'Allow Access'

Forget your password? No problem!

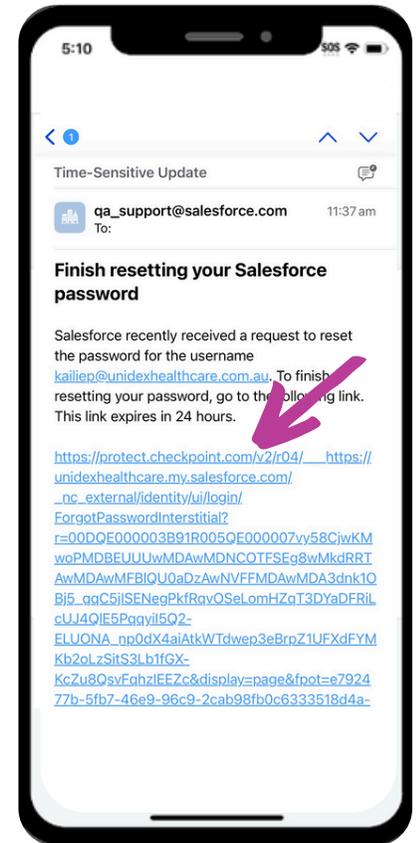

1. Click 'Forgot Your password'

2. Your username is:
uhc-[your email address]
(e.g. uhc-john@gmail.com)

3. Follow the prompts to
create a new password

Helpful Tips 💡

- > If you don't see the reset password email straight away, check your junk or spam folder
- > Make sure your app is updated before logging in
- > We recommend logging in ahead of your first session to ensure everything is working
